OVERVIEW /

Glean's Construction & Engineering Co is a multi-disciplinary engineering, and construction company. We have been serving clients in the public and private sector throughout Grenada and the Caribbean. The company has built a solid reputation for consistently and safely delivering contracts on time, on budget and to exacting standards. We fully understand that our success depends on the quality of our work and pride ourselves in providing optimum levels of service and first class contract delivery to our clients.

Glean's Construction + Engineering Co is 100% Employee owned.

Founded in
1995
Glean's Construction +
Engineering Co.

We have a wealth of expertise in developing infrastructure, buildings, sea defence, providing remediation, devising coastal and flood protection, road construction, and managing complex logistics for renewable energy.

Glean's Construction + Engineering Co is amongst the region's leading construction companies.

JOHANNA **TAMAR**
ARCHITECT

CAMILLO **MCQUEEN**
DRAFTER

We have an excellent track record of over **25 years of competence and reliability** in the Caribbean.

EXPERTISE /

Civil Engineering

Today, understanding and navigating the development approval process is critical to success. So is familiarity with the highly technical issues and state-of-the-art computer-based tools that are essential to modern civil engineering.

Glean's Engineering can take a project through planning and zoning, preliminary design, mapping/platting, and ultimately to the final design stage where the project is ready for bid and construction. Thereafter, we provide construction support through plan clarification, contractor and field surveyor coordination, and as-needed plan revision.

Bridging the Future of Grenada
Civil Engineering Designs

PROJECT /
SEAMOON CULTURAL CENTRE

Structural Engineering Designs

Glean's Engineering provides a variety of structural engineering services for governmental, industrial, commercial and institutional owners, contractors and architects. Structural systems include steel, concrete, masonry, timber, and polymer composites. We understand the needs of our clients and of present and future end-users. Our structural engineers design smart solutions for projects of all sizes, types, and levels of complexity.

Geotechnical Engineering

Glean's Engineering provides geotechnical engineering services, environmental sciences, engineering geology, construction observation and soil and material testing for land development, transportation, water resources and mining projects. We also provide forensic engineering and expert opinion for geotechnical engineering projects.

An aerial photograph showing a winding asphalt road through a dense, lush green forest. The road curves from the bottom left towards the top right. On the left side of the road, there are several houses with various roof colors (red, grey, blue). A concrete retaining wall runs along the edge of the road on the right side. The overall scene is a mix of natural greenery and human-made infrastructure.

EXPERTISE /

Architectural

We have a history of forming environments that everyone preserves. We flourish in the centre of complex projects that need experience and collaboration. For more than 25 years, responsive design has been our credo; we deliver exclusively innovative responses to all projects' details. The outcome is strong design solutions that speak to the site, the users and the client.

**Glean's Construction + Engineering Co is an
Architecture + Design Source.**

The outcome is **strong design solutions** that speak to the site, the users and the client.

Envisioning + Storytelling

Our process is rooted in envisioning and storytelling, a collaborative process that aligns us with our client's vision and, ultimately, becomes the compass that guides us. We work with clients to develop a unique vision that is centered around future memories, business goals, the existing environment, natural topography and cultural heritage of a specific location—threads of inspiration that eventually become our tapestry of design. By exchanging ideas and deeply understanding the unique vision for each project, we are able to create enriching, evocative and exceptional destinations.

Green Architecture

Sustainability + Wellness

Our strategic thinking for operational design is anchored on the principles of innovative service efficiencies, minimizing the impact on the environment, and supporting community economics, thereby enhancing both social health and well-being for the entire ecosystem.

Our highly creative team of **architects + designers** are committed to meaningful collaborations with clients, enlivened by the power of great design

EXPERTISE /

Property Appraisals + Valuations

Buying or selling a property? Require a market value assessment? We can guide you with expert property advice and independent valuations. Our property evaluators reside in the area in which they work, and they have a close understanding of the local financial activities and property market.

EXPERTISE /

Project Management

We are a leading project management firm in Grenada. We offer project management services for civil, structural & geo technical engineering projects. Our talented engineering consultants can manage projects from concept to completion. Need project management services for a project-big or small? We can add the maximum value to your projects.
